

## Customer information October 2013

### Classic OPzS and Sonnenschein A600 in new modern design

As part of a continuous improvement process, the Sonnenschein A600 blocks and Classic OPzS blocks ranges will be manufactured with new lids and new containers, with progressive implementation for each model.

For Gel A600 blocks the new lids and container will be grey (standard version) or white (flame retardant V0 version).

For the flooded OPzS blocks, the lids will be red and the containers will be translucent, to allow an excellent visibility inside the battery.

- › Durable PP plastic containers and lids, still transparent
- › Improved sealing pole and pole pin
- › The ability to measure the cell voltage disappear.
- › New design on the handles
- › Now with 20 years designlife at 20<sup>0</sup> C
- › In order to ensure a tight seal of the plug the valve types will be changed from bayonet type to screwed type

Deliveries start in the end of 2013/ beginning of 2014.
