### Extension of Sprinter XP range: New XP12V3400

GNB<sup>®</sup> Industrial Power is pleased to announce the launch of the latest addition to the Sprinter Top Terminal range: Sprinter XP12V3400. This new battery (12 Volt block, 3400 Watts) provides enhanced power, particularly for short discharges from 3 minutes. Thanks to its small footprint and superior design, it is the most cost-optimized solution for a variety of applications, particularly large data centers where the need for higher power continues to grow. The Sprinter XP12V3400's long lasting and reliable features support the trend towards higher efficiency power and ensure the continuous availability of critical data. Its dimensions make it suitable for a variety of racks and battery cabinets.

The Sprinter XP range is the perfect energy storage solution for uninterruptible power supply systems that require maximized space utilization combined with high energy density.

Sprinter XP are valve-regulated lead-acid batteries built with the AGM technology, therefore no topping-up of water is necessary during the whole life. Sprinter XP batteries are manufactured with the industry's most advanced process technologies and combine an excellent service life with outstanding high power performance.
