New Marathon M12V190FT

GNB® Industrial Power is pleased to announce the launch of the latest addition to the Marathon Front Terminal (M-FT) range: Marathon M12V190FT.

Designed for durability in telecommunications and electric utility applications, the Marathon M-FT series provides high performance, very long life and excellent reliability particularly in medium and long duration discharge applications. The location of the terminals on the front of the battery and the rope handles greatly facilitate the installation and maintenance of the block when placed in a cabinet enclosure or on a standard relay rack tray.

This new battery provides enhanced capacity (10 hour rate to 1.80 Vpc: 190 Ah at 20°C), and its dimensions are identical to the M12V180FT.

Date: July 2015
