

Customer Product Information

New Flip Top Plug for Classic EB and OPzS Blocks

From March 2015, all filled Classic EB and OPzS Blocks will be shipped with a new flip top plug (part number ZC16146329) already fitted, instead of the regular service plug.

This new plug allows topping up of water and measurement of electrolyte density without removing it.

For enhanced safety, ceramic funnel plugs ZC16146069 can still be ordered (no change).

From left to right: 1. ceramic funnel plug, 2. new flip top plug, 3. former service plug. All with M27 thread.

Büdingen, February 2015
