New Design for Classic EB (Energy Bloc)

As part of a continuous improvement process, and similar to the recent new design for Classic OPzS block range, the Classic EB range will be manufactured with new lids and containers, starting from **May 2015** with progressive implementation for each model.

Like OPzS blocks, the new EB containers are made of a highly translucent polypropylene material, to allow an excellent visibility inside the battery, as shown on the below picture.

There will be new part numbers (EPN) for all blocks, ending with the letter B instead of A. The new EPN should be used for all orders from April 1st, 2015.

Model	Current EPN	New EPN
EB 6215	NVEB060215WC0FA	NVEB060215WC0FB
EB 6240	NVEB060240WC0FA	NVEB060240WC0FB
EB 6310	NVEB060310WC0FA	NVEB060310WC0FB
EB 6350	NVEB060350WC0FA	NVEB060350WC0FB
EB 1260	NVEB120060WC0FA	NVEB120060WC0FB
EB 12110	NVEB120110WC0FA	NVEB120110WC0FB
EB12160	NVEB120160WC0FA	NVEB120160WC0FB
