New Part Numbers for Classic OPzS, OPzS Solar and OGi cells

As part of our continuous improvement process, selected models from the Classic OPzS, OPzS Solar and OGi cells ranges will be manufactured with new lids and containers, starting from May 2016 with progressive implementation for each model. For those models, the cell part numbers (EPN) will change.

The type of plastic material will not change: Acrylonitrile butadiene styrene (ABS) for the lid; Styrene acrylonitrile (SAN) for the container. The cells performance and dimensions remain identical and there is no restriction on the use of new and old design together. The accessories (plugs, connectors) are not affected either.

Please use the new EPNs for all new orders **starting April 1st, 2016**.
