

## Customer Information

### Sonnenschein GF 12 063 Y O Update

GNB Industrial Power, a division of Exide Technologies, announces that the battery type Sonnenschein GF 12 063 Y O was fundamentally revised to better meet customer requirements. This product update is part of GNB's continuous efforts to keep their products in the best shape in regards to performance and quality.

Correspondingly the cycle life of the battery was increased to 500 cycles at 70% depth of discharge according to IEC 60254-1. This was possible without changing the outer dimensions and the positioning of the terminals. The updated technical data sheet and the drawings of the new Sonnenschein GF 12 063 Y O are already available.

The introduction of the new product is planned for calendar week 42 / 2016.

Please take note that the internal GNB part number of this product will change from GF12063YO to GF12063YO4.
