## NETWORK POWER | New AGM Sprinter XP12V4400

GNB Industrial Power is pleased to announce the addition of a new model to the Sprinter P/XP range: **XP12V4400**.

The product is specially designed for Data Center and Industrial UPS applications with high-rate discharges from 3 to 20 minutes.

The new Sprinter XP12V4400 provides a perfect answer to the latest requirements of the Data Center world moving to higher power UPS requiring larger blocs.

Thanks to its high power, compact design and small footprint the Sprinter XP12V4400 will assure savings in installation on blocs, cabling, space and maintenance which allows a significant reduction of Total Cost of Ownership.

For more information, please contact your GNB sales representative or visit [www.exide.com](http://www.exide.com).
